

PIECING TOGETHER THE REALITY

When matters of financial fraud, theft, allegations of employee wrongdoing, and other misconduct occur, organizations are faced with the difficult task of discovering all of the facts. Often, a large portion of the evidence in these cases is digital in nature and found in a variety of formats, on a host of different devices; spanning the globe. Response to these allegations needs to happen quickly and most businesses will require external assistance to thoroughly and accurately gather, preserve, process and analyze the recovered information.

WGM's team of computer forensics experts are able to assist at any stage of a digital forensics investigation or matter of litigation. Our former FBI forensics experts are experienced working on sensitive and complex cases ranging from national security matters to bankruptcy fraud to employee misconduct. WGM also specializes in cases that involve electronic evidence or data preservation.

- **Cyber Incident Response:** WGM thoroughly examines physical and digital evidence to reveal whether the suspected incident actually exposed sensitive materials or not. WGM's expert team uses their computer forensic expertise along with traditional investigative techniques to get to the truth about a suspected incident.
- **Mobile Device Discovery and Examinations:** Using state-of-the-art tools and software, WGM can extract digital evidence contained on most mobile devices and phones. These devices are increasingly part of most incidents.
- **Data Collection and Preservation:** WGM is equipped to handle the volume and complexity of all your data collection requirements. Our forensically-sound, best-practice methodology to collect, process, analyze and preserve data ensures your evidence is secure and defensible for subsequent use in litigation or regulatory investigation.
- **Data Recovery and Forensic Analysis:** Whether your firm's sensitive data or intellectual property was manipulated or deleted on purpose or by accident, WGM's team of forensics experts can quickly analyze the remaining digital fragments to uncover critical information and reveal bad actors.
- **Expert Testimony and Reporting:** WGM's forensic experts have testified successfully in complex criminal matters and national security cases underscoring their experience and credentials to serve as an expert witness for any forensic or investigative matter involving your firm. WGM can act as a neutral party to collect and analyze data for later use in resolving disputes or matters of litigation.
